

STEP ONE

Find a strip of paper similar to the one shown above

STEP TWO

Make two small incisions approximately in the middle, like shown. Then fold the two new flaps to one side.

STEP THREE

To make the weight, fold a small portion to the back sealing the folds.

STEP FOUR

Cut approximately where the dashed line is, then fold the two blades with one going forwards, and one back.

STEP FOUR

Your helicopter should look like the one shown
